About Us:

PAPAN South Sudan Ltd is dedicated to enhancing water quality and sanitation through innovative solutions and strategic partnerships. Our core mission is to ensure that communities have access to clean, safe water through both hardware installations and capacity-building programs. With a team of highly skilled professionals, we specialize in solar motorization systems, water quality analysis, and infrastructure monitoring.

Our organization collaborates closely with government bodies, NGOs, and local stakeholders to design and implement sustainable water and sanitation solutions. We pride ourselves on delivering tailored services that address the specific needs of each community, ensuring long-lasting impacts on health, well-being, and economic development. Our comprehensive approach includes thorough assessments, practical solutions, and continuous support to maintain optimal performance and safety standards.

We are committed to empowering local communities through education and training, ensuring that individuals and institutions can manage and maintain water and sanitation systems independently. By fostering local ownership and capacity building, we contribute to long-term sustainability and resilience.

Who we are?

Vision:

To be a global leader in sustainable water and sanitation solutions, ensuring every community has access to clean water and improved sanitation facilities that foster health, dignity, and economic growth.

Mission:

Our mission is to design, implement, and maintain water and sanitation systems that meet the needs of communities while promoting environmental stewardship. We strive to empower communities through education, training, and sustainable solutions, ensuring long-term success and resilience.

Guiding Principles:

At PAPAN South Sudan Ltd, we are guided by a commitment to excellence, integrity, and innovation in all our operations. We create long-lasting solutions that balance environmental responsibility with practical functionality, ensuring sustainability in both design and implementation. We actively involve local communities in the design, implementation, and management of projects, fostering ownership and ensuring long-term success.

Our dedication to transparency and accountability ensures that all projects meet or exceed national and international quality standards. With a focus on continuous innovation, we strive to improve the efficiency, effectiveness, and sustainability of our solutions. Additionally, we believe in building strong partnerships with government bodies, NGOs, and local stakeholders to maximize our impact.

Company History:

PAPAN was established in 2022 as an Engineering and consultancy company offering a wide range of services to public and private institutions in South Sudan.

With years of experience in Engineering services, general consultancy, procurement and logistics, PAPAN has been at the helm of countless providing creative and innovative solutions for public and private entities in Uganda and South Sudan.

PAPAN currently has two coordination offices supporting operations and services in Kampala, Uganda and Juba, South Sudan.

Our Services:

01

Civil Engineering:

Our civil engineering expertise encompasses the design, installation, and maintenance of systems crucial for infrastructure and industrial development. We specialize in water pipe systems for large-scale industrial and government projects, delivering reliable and efficient solutions that meet stringent quality standards;

- Installation of water pipelines for industrial and municipal applications.
- Maintenance and repair of existing water pipe systems to ensure optimal performance.
- Design and implementation of customized mechanical solutions for infrastructure projects.
- Support for large-scale government and industrial water distribution initiatives.

02

Program Design:

We support Institutions design program interventions based on a sound Theory of Change, Feasible Resourcing strategies, Partnership Plans and Credible risk mitigation strategies.

Our customized working sessions provide clients with hands on experience on developing Theories of Change that define the expected pathways of change and their intervention logic.

03

Monitoring and Learning:

Develop result based Monitoring and Learning systems that track program outcomes, lessons from implementation and facilitate learning to adapt program/project strategies for greater impact. We facilitate learning by doing sessions with clients that enable them develop performance measurement frameworks, indicators, data collection and management systems. We simplify reporting by facilitating reflection sessions that enable clients tell their stories of change, make meaning of them, and harvest lessons relevant for improving programming.

04

Evaluation:

We support Institutions to commission Mid-term and End line program evaluations in line with internationally recognized standards of the Organization of Economic Development – OECD. We ensure that Evaluations are learning oriented and are designed to capture; Relevance, Effectiveness, Efficiency, Sustainability, and Impact created by project/program interventions.

Organizational Capacity Assessment:

We support Institutions conduct Capacity Assessments, and Sustainability Checks that are relevant in tracking changes in the enabling environment at sector and local level.

Our clients are helped better understand the strength of systems used to deliver and support management of services in their respective sectors. We believe that strong local systems are a backbone for sustainable interventions.

Capacity building workshop

Secretary - Ministry of Federal Affairs*

Capacity building workshop

with the ministry of federal affairs

A meeting of the Working Group on Federalism which was convened to discuss content of the Blueprint on

federalism and the upcoming National Conference on Federalism.

The valuable contributions from the Working Group were so impressive and shows how South Sudan would establish the best federal system that ease and foster quick development in all rural areas in the country.

It also highlighted the principle of transparency and accountability mechanism in the management of public resources that accompany core instruments and principles of federalism. Together we shall make a great difference for the betterment of our Republic.

‘Holding together for the greater Union.

In service learning:

We connect Academia and Civil Society Organizations to support in service learning for students and researchers and provide opportunities for them to design solutions for solve real world problems; Water and Sanitation crisis, Food and Nutritional security.

A Training and Consultancy company that promotes SMART development initiatives that improve wellbeing, transform lives, and secure a future. We work with Public, Private sector Institutions and Civil Society Organizations to leverage partnerships, develop local capacity to scale up and sustain development interventions.

We have championed cutting-edge work in monitoring, evaluation, and learning, harnessing innovation, and the power of collaboration to drive systemic change.

Solar motorization/ Pipe network monitoring Visit to Abuyung.

Assessment of the Office space for setting up mini laboratory for water quality analysis.

Water reservoirs construction.

Two (2) tanks of 5,000 liters are placed on 6m high tank stand to store water before discharging them to the tap stands for community collection at Abuyung trading center /PHCC.

The correction has been made after the main gate valve that control the out let floor of water from the water reservoirs to the water collection point at tap stands. Furthermore, the gate valve cover at the tap stand located at the trading center that was destroyed by water users. The water yard is fully operational with the 10,000 (2 x 5,000) water tanks that takes approximately 3 hours for the tank to be full.

Tap stands

The tap stands constructed at Abuyung trading Center and PHCC for water collection by the population.

Each tap stand is fitted with 4 taps to save time during the water collection and transportation.
